DVMS Institute™
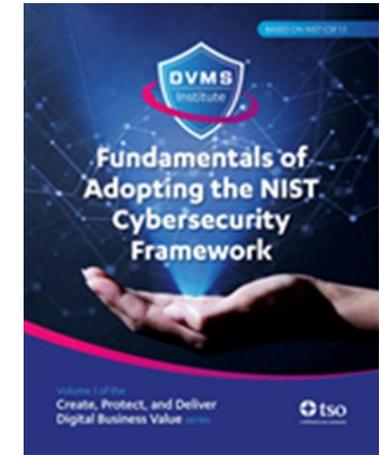

Digital Value Risk Management Publications, Training & Community

DVMS Mission, Vision & Programs

- The Institute:

  - **Mission** is to teach organizations of any size how to build an Adaptive, Cyber-Resilient Digital Value Management System (DVMS) capable of Creating, Protecting, and Delivering (CPD) digital business value.

  - **Vision** is to leverage guidance from NIST, ISO, and Industry Thought Leaders to create models and programs that teach any size organization how to leverage the NIST Cybersecurity Framework, existing business systems, and the Institute's Create, Protect, and Deliver (CPD) model to become adaptive, cyber-resilient digital businesses

  - **Programs** include **Publications, Accredited Certification Training,** and **Community** where its members can collaborate with other members and become contributing members to the DVMS and NCSP schemes.

Publications

Digital Value Management System™ Body of Knowledge

- **The Publications Provide:**
  - A way to make all employees aware of the fundamentals of digital business value and risk, its threat landscape, the NIST Cybersecurity Framework, and the role they play in deterring digital risk
  - The guidance practitioners and business leaders need to communicate with C-Level executives about the business value a NIST Cybersecurity program brings to existing digital business applications and employee productivity programs
  - The guidance cybersecurity and risk management practitioners and auditors need to Assess, Engineer, Implement, and Operationalize a NIST Cybersecurity Framework program across an enterprise and its supply chain. (Q3/2022)
  - The guidance Governance, Risk, and Assurance teams need to create a top-to-bottom culture of Creating, Protecting, and Delivering digital business value using the NIST Cybersecurity Framework, existing business systems, and the Institutes Create, Protect and Deliver (CPD) Model. (Q3/2023)
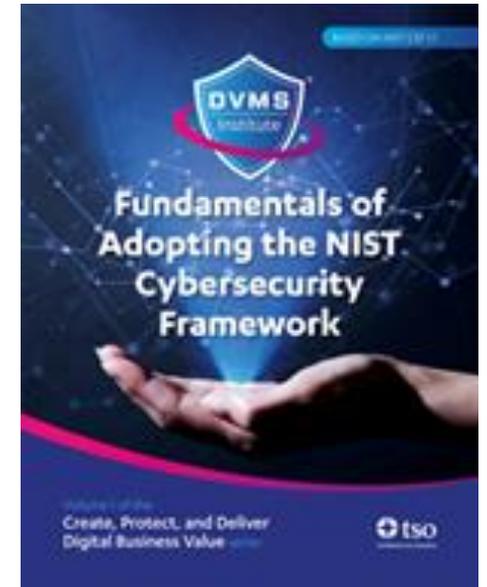

Accredited Certification Training

Awareness, Foundation, Practitioner, Specialist

DVMS Institute
