# DVMS Institute™

Digital Value Risk Management Publications, Training & Community

DVMS Institute®

DVMS Institute Mission and Vision

- The Institutes:
  - **Mission** is to help organizations leverage the DVMS-CPD overlay model to build a culture of Creating, Protecting, and Delivering (CPD) digital business value

  - **Vision** is to work with industry thought leaders to create Publications, Accredited Certification Training Programs, and a Community of Practice that teach organizations how to build cyber risk management programs that are fit for use, auditable for purpose, and in alignment with the NIST Cybersecurity Framework and other government regulations and standards

Publications

Digital Value Management System™ Body of Knowledge

DVMS Publications

- ## The DVMS Body of Knowledge Publications Provide:

  - A way to make all employees aware of the fundamentals of digital business value and risk, its threat landscape, the NIST Cybersecurity Framework, and the role they play in deterring digital risk

  - The guidance practitioners and business leaders need to communicate with C-Level executives about the business value a NIST Cybersecurity program brings to existing digital business applications and employee productivity programs

  - The guidance cybersecurity and risk management practitioners and auditors need to Assess, Engineer, Implement, and Operationalize a NIST Cybersecurity Framework program across an enterprise and its supply chain.

  - The guidance Governance, Risk, and Assurance teams need to create a top-to-bottom culture of Creating, Protecting, and Delivering digital business value using the NIST Cybersecurity Framework, existing business systems, and the Institutes Create, Protect and Deliver (CPD) Model. (Q2/2023)

- **The NCSP® Certification Training Programs Provides:**

    - The fundamentals of digital business value and risk, its threat landscape, and the role the NIST Cybersecurity Framework plays in helping organizations mitigate their people, process, & technology risk.

    - The fundamentals of the NIST Cybersecurity Framework (NIST-CSF) and how it creates a new way to communicate with C-Level executives about the business value a NIST -CSF program brings to existing digital business applications and employee productivity programs.

    - Practitioner guidance on a Fast-Track approach to assessing, engineering, implementing and operationalizing the NIST Cybersecurity Framework 800-53, 800-171, and ISO 27001 controls across an enterprise and its supply chain.

    - Practitioner guidance on how to leverage the NIST Cybersecurity Framework, the Institutes DVMS-CPD model, and existing business systems to create a culture-driven, adaptive, cyber-resilient organization capable of Creating, Protecting, and Delivering digital business value.

Community of Practice

Collaboration & Mentoring

- **The Community Provides:**

  - The Institute's Linkedin NIST Cybersecurity Professional (NCSP) mentoring community provides a vehicle for Institute members to share ideas, publicize events and expand their DVMS and NCSP® network.

  - An entry point for NCSP ® thought leaders to become contributing mentors to the community and to the DVMS and NCSP ® schemes
