

Digital Value Management System

Training & Mentoring Practice

Contact support@dvmsinstitute.com for more info

The DVMS Training & Mentoring Practice provides organizations of any size with expert guidance and training on building an adaptive digital value and resiliency management program that is fit for use, auditable for purpose, and compliant with government regulations and standards.

DVMS Awareness Training Workshop- This program introduces all employees to the fundamentals of digital business, digital business risk, and the NIST Cybersecurity Framework.

DVMS Core Team Certification Training Workshop - This program leverages the NCSP® Foundation and Practitioner certification training programs to prepare the core team for the baseline DVMS digital value and resiliency assessment.

DVMS Program Design Workshop - This program introduces the team to the fundamentals of creating the core DVMS Program and Team.

DVMS Assessment Workshop - This program teaches the core team how to assess an organization's current digital value and resiliency state (practices, controls, etc.) and then identify the gaps that must be mitigated to realize an organization's future digital value and resiliency state.

DVMS Implementation, Operations & Innovation Training Workshop - This program teaches the Implementation, Operations, and Improvement teams how to leverage the NCSP FastTrack™ model to adapt the controls and management systems necessary to support the organization's digital value and resiliency plan.

DVMS Management Platform Workshop - This program helps organizations identify and select a platform to deliver the management and reporting capabilities outlined in the organization's strategic plan.
