

# DVMS Institute™

Create, Protect & Deliver Trusted Digital Business Value™

# Mission and Vision

- **The DVMS Institute Mission** is to create a Simple, Pragmatic, and Scalable approach to digital value protection that fits organizations regardless of size, scale, and complexity.
- **The DVMS Institute Vision** is to teach organizations how to build a Digital Value Management Overlay System capable of delivering the **secure, digital business outcomes** expected by executives, government regulators, and legal advisors

# Digital Value Management System™ (DVMS) Components

- [Digital Value Management System \(DVMS\) Overlay Model](#)

- ✓ The DVMS Overlay Model enables companies of any size to build an Affordable, Pragmatic, and Scalable approach to adopting any Framework (NIST-CSF, CMMC, etc.) or Standard (ISO 27001, etc.) to deliver the secure, digital business outcomes expected by executives, government regulators, and legal advisors.

- [How an Overlay Model Works](#)

- ✓ The DVMS Overlay Model provides organizations a cost-effective way to leverage existing business systems and organizational capabilities to manage their digital risk, resiliency, and value.

- [DVMS CPD™ Model](#)

- ✓ The DVMS CPD Model represents a simple, connected, layered solution designed to deliver secure digital business outcomes at each layer of a digital enterprise

- [DVMS Z-X™ Model](#)

- ✓ The DVMS Z-X Model identifies the minimum viable business capabilities required to operationalize the DVMS Create, Protect, and Deliver (CPD) model

- [DVMS 3D Knowledge™ Model](#)

- ✓ The DVMS 3D Knowledge Model enables communication & collaboration between those responsible for protecting organizational digital business value

- [DVMS FastTrack™ Model](#)

- ✓ The DVMS FastTrack Model represents a phased approach to adopting and adapting a DVMS CPD Model across an enterprise and its supply chain

# Publications

---

Digital Value Management System™ Body of Knowledge

- The DVMS Body of Knowledge Publications Provide:
  - The Institute's publications take stakeholders on a journey into the world where the ever-changing cyber threat landscape intersects with digital business risk. The publications help organizations understand the relationship between cybersecurity and digital business value and how to leverage that relationship to create an adaptive, cyber-resilient digital business enterprise. The publications provide:
  - A way to make **all employees** aware of the fundamentals of digital business value and risk, its threat landscape, the NIST Cybersecurity Framework, and the role they play in deterring digital risk
  - The guidance **business leaders** need to communicate with C-Level executives about the value a NIST Cybersecurity program brings to existing digital business applications and employee productivity programs
  - The guidance **practitioners** (Business, GRC, Audit, Service Management, Cybersecurity, etc.) need to ensure that a NIST Cybersecurity Framework program is fit for use, auditable for purpose, and delivering the outcomes required by government regulators

# Accredited Certification Training

---

Awareness, Foundation, Practitioner, Specialist

# NCSP® Certification Training Programs

- **Accredited, Certified & Recognized Certification Training Programs:**
  - **NCSP Awareness** course and workshop teaches employees the fundamentals of digital business, its risks, and the NIST Cybersecurity Framework's role in helping organizations mitigate risk. This course includes the Fundamentals BOK publication, Certificate of Completion and a digital badge
  - **NCSP Foundation** course teaches employees the fundamentals of the NIST Cybersecurity Framework and how to leverage it to communicate with C-Level executives about the business value it brings to existing digital business applications and employee productivity programs. This course includes the Fundamentals BOK publication plus an exam voucher
  - **NCSP 800-53 Practitioner** course teaches employees a Fast-Track approach to assessing, engineering, implementing and operationalizing the NIST Cybersecurity Framework and its 800-53 security controls across an enterprise and its supply chain. This course includes the Practitioners BOK publication plus an exam voucher (implementer or auditor)
  - **NCSP Specialist** courses teach employees a Fast-Track approach to assessing, engineering, implementing and operationalizing the NIST Cybersecurity Framework and its 800-171 and ISO 27001 security controls across an enterprise and its supply chain. This course requires a Practitioner certification to attend. Course comes with an exam voucher (implementer or auditor)

# NIST-CSF Mentoring Practice

---

Enterprise Mentoring & Training Program

# NIST-CSF Enterprise Mentoring & Training Practice

- **Mentoring Program Service Offerings:**
- **DVMS Awareness Workshop-** This program introduces all employees to the fundamentals of digital business, digital business risk, and the NIST Cybersecurity Framework.
- **DVMS Core Team Certification Training Workshop** - This program leverages the NCSP® Foundation and Practitioner certification training programs to prepare the core team for the baseline NIST-CSF cyber risk assessment.
- **DVMS Program Design Workshop** - This program introduces the team to the fundamentals of creating the core NIST-CSF Program and Team.
- **DVMS Assessment Workshop** - This program teaches the core team how to assess an organization's current cyber risk management state (practices, controls, etc.) and identify the gaps that must be mitigated to realize an organization's future cyber risk management state.
- **DVMS Implementation, Operations & Innovation Training Workshop** - This program teaches the Implementation, Operations, and Improvement teams how to leverage the NCSP FastTrack™ model to adapt the controls and management systems necessary to support the organization's cyber risk management plan.
- **DVMS Management Platform Workshop** - This program helps the organization identify and select a platform to deliver the management and reporting capabilities outlined in the organization's strategic plan.

## Digital Value Management System

### Training & Mentoring Practice

Contact [support@dvmsinstitute.com](mailto:support@dvmsinstitute.com) for more info

The DVMS Training & Mentoring Practice provides organizations of any size with expert guidance and training on building an adaptive digital value and resiliency management program that is fit for use, auditable for purpose, and compliant with government regulations and standards.

---

**DVMS Awareness Training Workshop-** This program introduces all employees to the fundamentals of digital business, digital business risk, and the NIST Cybersecurity Framework.

**DVMS Core Team Certification Training Workshop** - This program leverages the NCSP® Foundation and Practitioner certification training programs to prepare the core team for the baseline DVMS digital value and resiliency assessment.

**DVMS Program Design Workshop** - This program introduces the team to the fundamentals of creating the core DVMS Program and Team.

**DVMS Assessment Workshop** - This program teaches the core team how to assess an organization's current digital value and resiliency state (practices, controls, etc.) and then identify the gaps that must be mitigated to realize an organization's future digital value and resiliency state.

**DVMS Implementation, Operations & Innovation Training Workshop** - This program teaches the Implementation, Operations, and Improvement teams how to leverage the NCSP FastTrack™ model to adapt the controls and management systems necessary to support the organization's digital value and resiliency plan.

**DVMS Management Platform Workshop** - This program helps organizations identify and select a platform to deliver the management and reporting capabilities outlined in the organization's strategic plan.

# Community of Practice

---

Community, Communication, & Collaboration

# Community of Practice

- The Community Enables its Members to:
  - Share ideas, participate in online events, and expand one's NIST Cybersecurity Professional (NCSP®) network
  - Become an NCSP Solutions provider specializing in one or more of the following specialty areas
    - General Practitioner, Content Development, Trainer, Mentor, Auditor, Implementer, Program Manager, Project Manager, Executive Sponsor, IT & Cybersecurity Subject Matter Expert
- Unlike other institutions, we do not charge fees other than those associated with value-added services that may be offered by the Institute or its contributing member network.
- Become eligible to participate in an expert-led NCSP Masters level training course that takes candidates on a deep dive into creating DVMS-CPD case studies across all the critical sectors that can be leveraged by the community in general
