

DVMS® NISTCSF Governance by Assurance™ Overlay System

In a world of continuous disruption, leadership today needs more than **paper-based compliance** to demonstrate they are fulfilling their strategic objectives for securing value, elevating trust, strengthening resilience, and ensuring accountability across their digital enterprise.

The [DVMS NIST Cybersecurity Framework Governance by Assurance™ Overlay System](#) shifts governance from a paper-based compliance exercise to an evidence-driven management discipline that continuously validates whether strategic intent is being fulfilled in operational reality.

Rather than replacing existing digital systems, the DVMS overlay governs them with continuous assurance, transforming fragmented operational data into trusted, audit-ready evidence, enabling organizations to identify and mitigate digital risks before they impact digital business operations.

Begin your DVMS NISTCSF Governance by Assurance training today by watching our [DVMS-GBA](#) and [NISTCSF](#) introductory training videos.

DVMS-NISTCSF-GBA Training Programs

Through structured learning and authoritative publications, the DVMS-accredited, certified, and globally recognized certification training programs teach organizations how to build a [NIST Cybersecurity Framework Governance by Assurance™ Overlay System](#) that unifies existing best-practice systems into a single source of verifiable truth, providing leadership and auditors with trusted, audit-ready evidence that digital business objectives are being fulfilled.

Launching a DVMS NISTCSF-GBA Program

It all starts with selecting the first digital service you want to operate with the new DVMS capabilities. It will serve as the blueprint for the remaining services.
